08.06.88 as 017475 Filed 10.06.87 (980MJ)

The hinge (2) comprises a first mounting for attaching the hinge to a fixed support and second mounting for attaching the hinge device to a panel (4). An arm assembly is pivoted at one end to the first mounting and pivoted at its other end to the second mounting.

The arm assembly comprises arms articulated one to another such as to permit the panel to be displaced perpendicular to the plane of the panel and to permit the fixing distance between the first and second mounting to be varied to suit different size panels.

ADVANTAGE - Reduces risk of injury to user (12pp Dwg.No.1/1)
